

continue keyword

- Ignores the next statements
- Goes back to **increment** and **loop condition check**

```
for (int i = 1; i < 10; i++) {  
    if (i%5 == 0)  
        continue;  
    printf("%d\n", i);  
}
```

break keyword

- Exits from the inner loop
- Ignores the next statements

```
for (int i = 1; i < 10; i++) {  
    if (i%5 == 0)  
        break;  
    printf("%d\n", i);  
}
```
